

# Industrial Technology May News

Here is what our IT students have been up to as the school year comes to a close:

1. **Applied Physics Practical Extensions**- Dan Wilkins incorporates noxious weed spraying into his fluids unit in Applied Physics. The supervisors of the Cascade County Weed District taught students how to mathematically determine how much water volume they are spraying out per acre and then calculate how much chemical to put into their backpack sprayers. Thank you Cascade County! See Tribune Article: <http://www.greatfallstribune.com/story/news/local/2017/04/12/students-apply-physics-weeds-energy/100395816/>

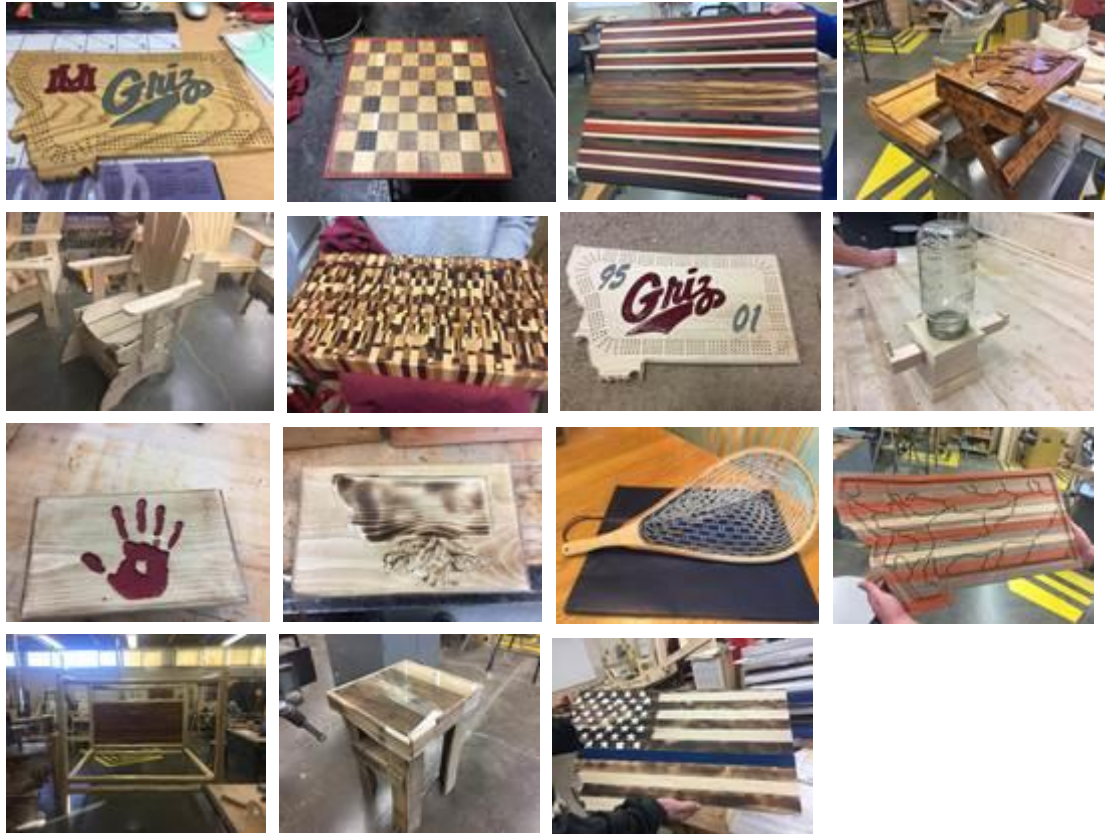

2. **High School House Open House Celebration**- On Thursday 5/25 we will celebrate 20 years of partnership with NeighborWorks and the High School House Program! Please join us to see the beautiful homes our students have constructed this year for two low income Great Falls families. GFH 1624 8<sup>th</sup> Ave. S. 4:00-5:00 pm, CMR 1636 6<sup>th</sup> Ave NW 5:30-6:30 pm. RSVP 761-5861.
3. **Trailer Wiring**- The Introduction to Automotive Electrical students completed a trailer wiring lab.

4. **Skills USA State Leadership Conference**- Our students took home honors in drafting, carpentry, and welding!

5. **Woods Projects**- Our carpentry students have been hard at work making amazing projects! From cribbage boards to fishing nets and jewelry boxes, check out their work!

Thank you for supporting GFPS, our kids, our community, and our future!
