

At Big Brothers Big Sisters, we create and support one-to-one mentoring relationships that ignite the power and promise of youth.

Our evidence-based programs build social and emotional support, confidence and resilience that help to ensure young people are college and career ready and have a healthy physical and mental wellbeing.

➤ **96% of Littles are confident they can say no to drugs, violence, and skipping school**

➤ **95% of Littles feel like they belong**

➤ **84% of Littles have better grades, academic goals, and confidence**

National research confirms that children matched in Big Brothers Big Sisters programs are more likely to excel and make better life choices, and we believe that every child can benefit from the additional support and insight a mentor can offer.

BBBS is now enrolling for its Community and eMentoring Programs!

In the **Community Program**, mentors (Bigs) meet with their mentees (Littles) several times per month out in the community for a couple of hours. Matches can go hiking, meet for hot cocoa, bake cookies – the sky is the limit!
For Littles 6 and older.

In the **eMentoring Program**, Bigs and Littles meet “virtually” for at least 45 minutes per week via technology devices and even old-fashioned pen and paper. Matches develop positive mentoring connections, while focusing on academics, college, and career preparation. For Littles 13 and older.

All matches are expected to commit for at least 12 months.

Safety and Training

To facilitate successful relationships and overall safety, every mentoring match receives ongoing support from professional BBBS staff. Additionally, Bigs, Littles, and parents receive pre-match training related to successful mentoring, child safety, online safety, and healthy relationships.
